

NC NEMO is a collaborative of:

- NC Cooperative Extension
- NC State University
 - College of Agriculture and Life Sciences
 - College of Design
 - College of Natural Resources
- University of North Carolina
 - Coastal Studies Institute
 - NC Seagrant
- ECU Center for GIS
- NC Division of Water Quality
- National NEMO Network

The North Carolina NEMO program:

- involves counties and municipalities
- addresses regionally specific needs
- focuses on the land use/water quality link
- encourages watershed level thinking
- member - national NEMO network

**Nonpoint
Education for
Municipal
Officials**

a national education program designed for local land use officials to address the relationship of land use and natural resource protection.

A multidisciplinary initiative offering coordinated education and assistance on land use and water resource protection

www.ncsu.edu/nemo

NC NEMO partners collaborate to help communities put information to work through education, policy initiatives and on-the-ground projects

Program areas:

- community resource assessments
- low impact development
- better site design
- stormwater best management practices
- watershed planning
- geographic information systems (GIS)
- natural resource based planning
- green infrastructure
- stream and wetland restoration
- policy analysis
- collaborative skills training
- community visualization and design
- urban forestry
- public participation

raise awareness of the connections between land use, water, and a thriving community

identify natural resources

choose where to develop

use low impact development

restore ecological function

protect your community's natural resources and quality of life
