

**Wake County Sustainability Task Force  
DRAFT Energy Strategies**

1. Support NC Renewable Portfolio Standard
2. Support development of Smart Grid infrastructure
3. Develop or support charging stations for electric cars
4. Support development and use of renewable energies (solar, wind, geo thermal, methane)
5. Support subsidies to attract energy-related technologies.
6. Explore and develop clean energies (such as nuclear) while assessing public health risks.
7. Provide incentives for energy efficient buildings, appliances
8. Evaluate & adjust ordinances to identify limitations to and opportunities for energy efficient building and lighting design.
9. Educate citizens, commercial, and industry about conservation and energy efficiency.
10. Support energy audits and retrofits for private & public buildings
11. Audit Wake County facilities (& schools) and retrofit for energy efficiency.
12. Partner with others to participate in demonstration and research projects.
13. Support market-based mechanisms for reducing emissions from production (cap for fee structure, fee schedule)
14. Support & identify new sources and means of energy production (landfill for example)
15. Support transportation planning & implementation that reduces emissions
