Tel: (770) 493-9401, Fax: (770) 493-9257

Harold E. Ford Foundation

[www.poultryegg.org](http://www.poultryegg.org)

The U.S. Poultry & Egg Harold E. Ford Foundation was established to provide financial support for student recruiting efforts at universities with poultry science departments that award degrees in poultry science. That list currently includes the University of Arkansas, Auburn University, the University of Georgia, Mississippi State University, North Carolina State University, and Texas A&M. Last year, \$100,000 was shared between them. The funds are allocated to these six institutions once each year to be used for a variety of activities to attract students to enroll in their poultry science departments.

The foundation also provides recruiting funds to institutions without distinct poultry science departments, but with identifiable poultry programs. Application must be made for these grants, up to \$7,000 each. They are also awarded once a year based on need and how they are intended to be used. Many of these institutions of higher learning without separate departments offer quality poultry studies, so they are an important part of the foundation's ultimate goal of attracting young people to study for careers in the poultry industry.
