

International Course on Poultry Production

NC STATE UNIVERSITY

DEPARTMENT OF
**POULTRY
SCIENCE**

Objective

To provide updated scientific and technical information and hands-on experience to improve commercial poultry production.

Learning Opportunities

Classroom instruction

Interaction with:

- Poultry scientists with worldwide experience
- Industry personnel
- Veterinarians

Laboratory exercises

Tours to: - Feed mills - Hatcheries

- Breeder and grow-out houses
- Processing plants

Classroom and Laboratory Instruction

Program

Breeders, Incubation and Hatchery Management

- Broiler breeder management
- Turkey breeder management
- Incubation biology and principles
- Hatchery management
- Troubleshooting incubation
- Impact of incubation on live performance

Nutrition, Feeding, and Feed Mill Technology

- Poultry nutrition
- Feed mill management
- Feeding practices
- Modeling and Operations Research
- Nutrient and waste management

Management and Production

- Broiler management
- Layer management
- Turkey management
- Lighting programs
- Ventilation and brooding
- Economics and Decision making

Program

Health, Welfare and Food Safety

- Pathology
- Vaccine management and Marek's control
- Biosecurity and disease control
- Insect and rodent control
- Poultry welfare
- HACCP & pathogen intervention strategies
