

Speakers

David Halley is a NC Registered Forester and SAF Certified Forester with True North Forest Management Services in Holly Springs, NC. He is a forestry and wildlife graduate of Virginia Tech. He spent fourteen years as a Service Forester, District Forester and Regional Resource Forester with the Virginia Department of Forestry. In 1999 he relocated to North Carolina and established True North Forest Management Services.

Chris Moorman is Associate Professor and Wildlife Extension Specialist at NC State University. Chris works with professionals and private landowners interested in the effects of forestry practices on wildlife. During the past ten years he has conducted several research projects to investigate potential effects of forest management on birds and salamanders.

Mark Johns works for the NC Wildlife Resources Commission as the NC Coordinator for Partners in Flight, a program that focuses on conservation of migratory birds throughout the Americas. Mark has been an instructor in the Department of Forestry & Environmental Resources at NC State University since 1990 and was formerly the Chief Naturalist at Hemlock Bluffs Nature Preserve in Cary, NC.

Danny Ray is a Certified Wildlife Biologist with Bachelor's degrees in Fish and Wildlife Management and Natural Resources Management, and a Master's degree in Biology. He worked as a Wildlife Technician for over 12 years and now works with the NC Wildlife Resources Commission as a Private Lands Biologist. He is charged with providing technical guidance to private landowners for forest and wildlife habitat management.

Forest Landbird Legacy Program and Forest Landbird Management October 3, 2007 - Four Oaks, NC Agenda

- 9:30 Registration and coffee
10:00 Morning Classroom Session
- Welcome/Introductions/Logistics
 - FLLP: An Approach to Benefit Forest Landbirds - Mark Johns
 - Silvicultural Approaches to Improve Forest Landbird Habitat - Chris Moorman
 - Case Study: Approved FLLP sites - Danny Ray and David Halley
 - Questions/Discussion
- 12:00 Lunch
12:45 Field Session
- Observing and Discussing Forest Management Techniques In the Field
- 2:30 Break
2:45 Afternoon Classroom Session
- Continued discussion of forest management techniques to benefit landbirds in the field
- 4:00 Final discussion in the classroom
4:30 Adjourn

Registration and Fees

Preregistration is required for this workshop. The registration fee is \$45 and includes workshop handouts, lunch, refreshment breaks and field trip transportation. **Registration deadline is September 24, 2007.**

Cancellation Policy

Cancellations made by September 24 will receive a full refund less a \$15 service charge. Refunds will not be given for cancellations after the deadline - in this case it is recommended you send a substitute. Note: If the workshop is cancelled by FEOP for any reason, FEOP will fully refund your registration fee; however, FEOP is not responsible for any other expenses incurred.

Forest Landbird Legacy Program (FLLP) & Forest Landbird Management

October 3, 2007
**The Rudolph Howell and Son Environmental
Learning Center,
Four Oaks, NC**

Sponsored by
NC Cooperative Extension Forestry
NC State University
Forestry & Environmental Outreach Program
North Carolina Division of Forest Resources
NC Wildlife Resources Commission
US Fish & Wildlife Service

About the Workshop

The Forest Landbird Legacy Program (FLLP) is a voluntary wildlife conservation program for private non-industrial forest landowners in all parts of NC who want to manage their mature forests to benefit forest dwelling landbirds. The focus of the FLLP is migratory “birds of conservation concern” identified by the Partners In Flight assessment for NC. The FLLP will build appreciation for songbirds and their forest habitats, provide recognition to sustain migratory bird populations, and provide expert planning and financial assistance for restoration and enhancement practices.

Cost sharing is available to any non-industrial forest landowners including private owners, partnerships, corporations, not-for-profits, local government, and Indian tribes. Land eligibility is determined by the “50/50 rule” that calls for forests to be a minimum of 50 years old and 50 acres in size. The program is available statewide.

FLLP participants receive assistance from professional wildlife biologists and foresters to develop a landbird management plan. Reimbursement for a portion of costs incurred implementing a forest landbird conservation plan is also available. Each participating landowner also will receive a Forest Landbird Legacy sign and certificate recognizing their participation in the program and their commitment to bird conservation.

This workshop will introduce attendees to the FLLP program, describe forest management techniques that promote bird habitat and detail a case study by foresters who have already implemented this conservation program.

Location

The workshop will be held at The Rudolph Howell and Son Environmental Learning Center (Howell Woods) in Four Oaks, NC. Directions to the site will be sent with your registration confirmation letter.

Accreditation

The workshop will offer Category 1 Continuing Forestry Education credits (CFEs) from the Society of American Foresters. Wildlife Society members should self-report this workshop for their credits.
