

Extension Forestry

www.ces.ncsu.edu/forestry

Our Mission

To enable North Carolinians to make informed decisions concerning the management, enhancement, and enjoyment of their forest resources through research-based information and education.

We support NC State's land grant mandate by maintaining a diverse extension and outreach program. We believe in sharing our knowledge with the people of North Carolina and in supporting the economic prosperity of NC communities. Extension Forestry works hard to make sure that the public, landowners and professionals all have an opportunity to learn of new discoveries affecting their lives as soon as possible. We do this by sponsoring Extension Programs that reach people in a variety of different ways.

Our Programs

Family Forestry - Enhancing natural resource stewardship and improving economic well being through active management

Community Forestry - Improving the health of community forest through management and policy.

Wildlife Management – Promoting active management of urban areas, cropland, and forestland for wildlife

Environmental Stewardship – Improving forest health and promoting natural resource-based alternative income opportunities

Woody Biomass and Renewable Energy – Addressing global climate change through policy and energy markets

Youth Education – Connecting youth with the natural environment through 4-H and Project Learning Tree.

Christmas Tree Production & Marketing – Promoting economic development through best management practices and sound business skills.

Forestry & Environmental Outreach – Improving economic well-being and enhancing job skills of natural resource professionals.
