

MECKLENBURG COUNTY COOPERATIVE EXTENSION

DEADLINE TO ORDER IS NOVEMBER 8, 2013

PLANT PICK-UP NOVEMBER 14 & 15

Please call the Cooperative Extension Office at 704-336-2082 or visit our website at mecklenburg.ces.ncsu.edu to place an order.

All plants are \$8 each and come in 1-gallon containers.

Blueberries

- **Climax**—Early fruiting variety with upright growth habits and more of an open spreading crown than other varieties. Climax has been used for years in commercial, pick your own, and home settings. Berries are firm with excellent flavor, good color, and a very small stem scar.
- **Premier**—Ripen early to mid season but usually earlier than other mid season varieties. Fruit are larger in size with excellent color, great flavor and a dry stem scar. Plant growth is upright and vigorous. Great for hand picking.
- **Brightwell**—Fruit ripens in early June through mid July. Plants have very vigorous and upright growing characteristics. Variety is very varieties for fruiting. Harvest period is 35 Berries have a medium size, excellent flavor, and a dry stem scar.

Blackberries

- **Natchez**—Thornless variety. Semi-upright growing plant. Fruits are very large, elongated and glossy black in color and good flavor.
- **Ouachita**—Fruit are large in size, very good flavor, and an average sugar content of 10- 11%. Fruit ripen mid season over about five weeks with consistently high yields.

Raspberries -

- **Nova** —Medium in size, dark red, firm, juicy, very sweet, and ripen early summer. Heat, drought, and disease resistant.
- **Caroline** — Large in size, firm raspberries. The vigorous canes are healthy and disease-resistant. Ripens in June, then repeats in September.
