AUGUST - FALL VEGETABLE GARDENING: EXTENDING YOUR HARVEST

Wednesday, August 19th / 6:00 - 7:30 pm (Story Room)

Vegetable gardening for the year does not have to end when the tomatoes and cucumbers do! This workshop will focus on strategies and timing to maximize yields and extend the harvest from your vegetable garden by growing fall and winter crops. We'll talk about season extenders and other tips and techniques to keep your garden producing well past the first frost.

SEPTEMBER - FLOWERING TREES AND SHRUBS: FALL IS FOR PLANTING

Wednesday, September 23rd / 6:00 - 7:30 pm (Morgan Room)

Learn how to easily extend the bloom-time in your yard by making the most of flowering trees and shrubs. "Fall is for Planting!" - so now is the time to talk about how to select, install, and maintain these special plants. We will also discuss which ones do especially well in the growing conditions found in our Piedmont area gardens.

OCTOBER - COMPOSTING AND VERMICOMPOSTING: RECYCLING WITH NATURE

Wednesday, October 21st / 6:00 - 7:30 pm (Morgan Room)

What to do with all those leaves?! Composting is a great way to recycle, and it also produces a fantastic organic amendment that improves the fertility and texture of your soil and helps everything grow better. We will discuss easy ways to start composting in your own backyard, and what should or shouldn't be composted. We'll also go over the to-do list for having a successful "worm bin" at home.
