

**BLUEBERRIES- Require another variety to insure good pollination and fruit set.**

**Climax** - (rabbiteye) Producing medium sized berries with a sweet flavor, Climax is an early ripening plant. These plants are upright with an intense green foilage. Climax is one of the very best blueberry plants for harvesting.

**Tifblue** - (rabbiteye) Berries are medium to large and light blue. Berries ripen in early to mid-season (mid-June).

**Powder Blue** - (rabbiteye) Powder Blue has reliable crops of large berries because of its spring frost resistance. The light blue, firm fruit hang in clusters, resist cracking and hold a sweet flavor. The shrub is vigorous and upright. Ripens in mid-late season

**STRAWBERRIES- Strawberries are self fertile and do not require another variety to pollinate. Varieties are good for eating fresh or freezing.**

**Chandler** – (June bearing) Chandler strawberry plants produce delicious large sweet fruit. The berries are very firm and excellent for home gardens. These berries are ideal for desserts and freezing. This variety is used frequently in large u-pick operations due to the excellent quality of its fruit and very high yields. This variety is a June-bearer and bears one year after planting. You will enjoy large sweet berries in your own back yard.

**Eversweet** – (ever-bearing) Eversweet Strawberry produces very sweet berries with long large cone shaped fruit and delicious flavor. Produces all summer through the heat (100 degrees F) and into the fall. Ripens each summer and continues to fruit into fall.

**FIGS**

**Celeste** - Most cold hardy variety. Flesh is white to rose color. Skin is purplish brown. Known as best fig for its size. Has a complex sweetness that leaves a pleasant aftertaste. Excellent for canning and preserving. Trees grow to large size.

**Brown Turkey**- An everbearing favorite. This fruit is delicious fresh or after being dried for tasty treats. Keeps well. Heat-tolerant. Ripens in June. Self- pollinating.

**BLACKBERRIES- Blackberries are self fertile and do not require another variety to pollinate.**

**Triple Crown**- Excellent flavor, longer season berry, best for jams, cobblers and fresh eating. Bears fruit on 2<sup>nd</sup> year canes.

**Prime Ark Freedom**- Very large, flavorful berries that produce early. First year canes(primocanes) should have a ¾-1” tip removed when canes are 12-15 inches tall and again when branches are 30 inches tall. Bears fruit on 1<sup>st</sup> year canes.

**Navaho** - The Navaho Blackberry is a thorn-less variety that is upright, meaning it does not need a trellis to grow on. The Navaho Blackberry Plant produces huge tasty berries in large clusters. Bears fruit on 2<sup>nd</sup> year canes.

**GRAPES**

**Concord** - (seedless) Concord Seedless grapevine is very similar to Concord Seeded except it is seedless and has a sweeter flavor. This grapevine variety is excellent for pies, jellies, jams, juice and fresh eating.

**Neptune** – (seedless) The Neptune grapevine produces beautiful yellow-green seedless fruit. This grapevine produces some of the largest white grapes available. It is a fairly new variety producing big, juicy, highly flavorful grapes that resist cracking, even in adverse conditions. Produces large and long clusters. This grapevine variety is also disease-resistant and cold-tolerant.

**MUSCADINES**

**Ison** – Black self-fertile variety, excellent size, production, taste and quality. Edible skin, large clusters and disease resistant. Ripens early to mid- season. Makes great jelly, juice, and wine.

**Hall**- (bronze) This is a new variety released from University of Georgia. This large fruit is an early ripening variety with a beautiful bright, yellow golden skin. Vine is vigorous, disease resistant and is a heavy bearer. Fruit is sweet and juicy with excellent flavor. High dry scar percentage.

**RHUBARB**

**Victoria** - Very sweet and considered one of the best! Enjoy rhubarb throughout the summer. Grows fast. Great for rhubarb pie that melts in your mouth.
