North Carolina State University and North Carolina A&T State University commit themselves to positive action to secure equal opportunity regardless of race, color, creed, national origin, religion, sex, age, veteran status or disability. In addition, the two Universities welcome all persons without regard to sexual orientation.

²Employment includes both full- and part-time jobs.

³Labor income includes all forms of employment income, including employee compensation (wages and benefits) and proprietor income.

⁴Value added is the difference between industry output and the cost of intermediate inputs. It consists of compensation of employees, taxes on production and imports less subsidies, and gross operating surplus.

⁵Industry output is the total annual value of production by an industry.

⁶Direct contribution is a series of production changes or expenditures made by producers/consumers as a result of an activity.

⁷Total contribution is the sum of direct, indirect, and induced contribution effects generated by the sector.

⁸Timberlands are a subset of forestlands that are not reserved by law and potentially available for commercial timber harvest. Federal, state and local governments own public timberlands. Non-industrial private landowners (i.e., farm forests, family forests), forest industry, or other corporate businesses (i.e., timber investment management organizations) own private timberlands. 2020 Data are retrieved from USDA Forest Service Forest Inventory and Analysis (https://apps.fs.usda.gov/Evalidator/evalidator.jsp).

⁹Reserved forests, as used here, are for public lands where the law does not permit commercial timber production.

¹⁰Harvests include removals during timber harvests and removals for other reasons such as land conversion.
